FUEL SYSTEM DIAGNOSTIC TIPS

Accurate diagnosis prevents unnecessary fuel pump replacements, returns, warranty claims and unhappy customers

There's a
90% chance the fuel pump will fail in under 30 days if you do not clean the system before replacing the pump*

*US Motorworks

DON'T FORGET

Check the following before ordering a new fuel pump

Electrical

- Bad fuel pump relay
- Blown fuse
- Loose, shorted, or corroded wiring connection in the fuel pump circuit
- Low charging voltage

Fuel Pressure or Volume

- A plugged fuel filter
- A pinched or restricted fuel line
- A leaky or defective fuel pressure regulator

WHEN REPLACING A FUEL PUMP

- Replace old filter or strainer
- Flush, clean, or replace the fuel tank
- Inspect, repair or replace suspect vehicle connectors and wiring
