IN-PERSON, VIRTUAL, AND ON-DEMAND COURSES TO FIT YOUR SCHEDULE

- Training is built around actual case studies and practical, specific, expert advice to maximize the use of your time.

AIR CONDITIONING TIPS & TECHNIQUES

- Understand and identify new technologies and their impact on HVAC, perform service, diagnose, and properly replace HVAC components.

AIR CONDITIONING SECTION 609 DISCUSSION AND CERTIFICATION

- Prepare technicians for the legally-required EPA 609 certification, which tests the proper use of MVAC servicing equipment, the applicable regulatory requirements, the importance of refrigerant recovery, as well as the effects of improper handling of refrigerants.

Developed by master technicians and professional trainers

Courses cover a wide range of topics and experience levels, from beginner to expert

Useful handouts and certificates of completion available for each course

NEED TRAINING? WE CAN HELP YOUR SHOP.

TRUGRADE™

TECH TIP

The condenser should be replaced when there is a major compressor failure. Flushing will not completely remove debris and could shorten compressor life.

Add refrigerant to complete the job
